

Satellite Tasking

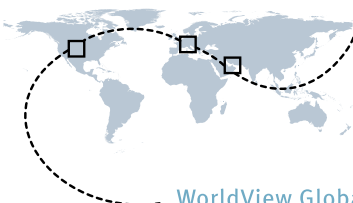

QuickBird

WorldView-1

WorldView-2

WorldView Global Alliance™ delivers geospatial content the way you want it, when you want it.

We provide clearer, more accurate visual perspectives for spatial applications and decisions.

The DigitalGlobe constellation of high-resolution satellites offers unsurpassed accuracy, agility and collection capacity, imaging more of the world in the finest level of detail. It is currently able to collect over 500 million km² of quality imagery per year, offering tremendous tasking capacity as well as building an ImageLibrary already larger than any other. Recently launched in October 2009, WorldView-2 doubles our collection capacity and allows us to deliver your area of interest faster than ever before.

CURRENT EARTH IMAGERY WHEREVER YOU NEED IT

The most effective way for us to provide you with a reliable source of imagery is to collect it prospectively and have it ready and waiting for you in our vast ImageLibrary. However, for those times when your specific requirements cannot be satisfied from what we have on-hand, DigitalGlobe offers a flexible and comprehensive set of tasking options for you to obtain current Earth imagery wherever you need it. We maintain the largest sub-meter constellation of satellites, with QuickBird, WorldView-1 and WorldView-2 all available for tasking your particular area.

TASKING OPTIONS

DigitalGlobe offers four tasking options designed to best meet the range of customer needs. These fall on a continuum that balances the cost against your project deadlines, certainty that the imagery will be able to be acquired, and control over the collection window.

Select

Our core tasking option used for most orders.

Select Plus

A higher priority version of Select that offers shorter collection windows, especially for areas of greater competition.

Assured

Our unique, high priority option that offers guaranteed delivery based on satellite capacity that is exclusively dedicated to these orders. If, in the unlikely event we fail to provide your complete AOI as promised, you will receive free imagery from our ImageLibrary to make up the difference. We are the only company to offer a guarantee of this kind.

Single Shot

Another unique guaranteed-delivery option that provides specific access to the QuickBird satellite. As little as six hours after you confirm a Single Shot order, we can acquire an image of your AOI. Note: there is no cloud cover protection for this option.

SPECIFICATIONS

	SELECT	SELECT PLUS	ASSURED	SINGLE SHOT*
Priority	Normal	High	Guaranteed—dedicated capacity	Guaranteed—specified orbit
Collection Window	Flexible: customer selected (up to 365 days) or DigitalGlobe suggested	Flexible: customer selected (up to 365 days) or DigitalGlobe suggested	DigitalGlobe suggested only (must have high feasibility)	Customer selected from 1 – 14 days
Available Satellites	QuickBird WorldView-1 WorldView-2	QuickBird WorldView-1 WorldView-2	QuickBird WorldView-2	QuickBird
Product Exclusions	None	Basic Stereo Pair	Basic Stereo Pair	Basic Stereo Pair, Ortho Imagery
